**A MESSAGE FROM
THE COMMANDING OFFICER
NAVY ENVIRONMENTAL HEALTH CENTER**

Dear Workshop Participant,

On behalf of the Navy Environmental Health Center (NEHC) staff, I am pleased to welcome you to Chesapeake and Virginia Beach, Virginia and to the Forty-Third Navy Occupational Health and Preventive Medicine Workshop. This year we are holding our workshop in conjunction with the Ninth Annual Independent Duty Corpsmen Conference and the Fifth Annual Combined Operational and Aeromedical Problems Course.

The theme for this year's Workshop, **Naval Medicine as a Defensive Weapons System**, forms the framework for our multidisciplinary program of outcome-focused, operationally oriented public health programs in the areas of occupational health, preventive medicine, health promotion, and operational medicine. Prevention is a key element of Force Health Protection - essential to maintaining a Healthy and Fit Force and minimizing casualties in both deployed and non-deployed environments. Given this direct link to the war fighter, we in the Prevention Community must continually seek innovative ways to monitor and protect the health of those we serve over the full range of current and future threats. I hope that this Workshop will provide the opportunity to enhance our Force Health Protection capability - both individually and collectively.

I am particularly pleased to offer you an opportunity to network with and learn from not only your colleagues in your own professional discipline but also the other health and safety professionals who are attending. I believe that the Opening Session, multidisciplinary scientific sessions, and social events, combined with community-specific presentations, will facilitate easy interaction and networking between all specialties during the Workshop.

I encourage you to take advantage of this opportunity to share the latest and greatest from our respective fields, renew old acquaintances, and meet new shipmates. If you have questions, concerns, or suggestions about the Workshop, please feel free to contact any Navy Environmental Health Center staff member onsite during the Workshop.

D. A. HILAND
Captain, Medical Corps
United States Navy
Commanding Officer

Registration

REMINDER: Registration will be closed for Opening Ceremonies on 22 March 2004, 0800 - 1200

Workshop attendees are required to check-in at one of the Workshop registration areas. The 2004 Workshop will have two registration areas to serve you. There will be a registration area at the Chesapeake Conference Center in the Monroe Room and a registration area at The Founders Inn. Attendees who pre-registered for the Workshop by mail, electronically, or by fax will only have to pick up their Workshop information packet to include the Workshop Program, and identification badge. Attendees who pre-registered for courses will have received course approval/confirmation. There will be computers available for attendees to enter, update, or change course and session selections in the registration areas. CEU/CME credit will be done electronically this year. At the end of the conference you may validate courses/sessions you attended and print your own certificate(s). This can be done on sight in the registration areas or from any Internet capable computer. Forms will also be available in the registration areas for those who cannot validate course attendance on-line.

There is no registration fee for the Forty-Third Navy Occupational Health and Preventive Medicine Workshop, the Ninth Annual Independent Duty Hospital Corpsmen Conference, or the Fifth Annual Combined Operational and Aeromedical Problems Course. Please see the schedule below for hours of registration.

Your cooperation in officially registering for the Workshop is critical to its success and future presentations.

The Workshop must be approved each year by the Bureau of Medicine and Surgery, and approval is directly dependent on the Navy Environmental Health Center being able to demonstrate that the Workshop provides continuing professional education to a significant number of Navy personnel in the occupational health, preventive medicine, and health promotion communities. For these reasons, **registration is requested even for people attending only part of the Workshop**, or who live in the Chesapeake/Virginia Beach area and will not be staying at the Founders Inn or the Chesapeake Conference Center. In addition, registering for the Workshop is the only way to receive your Course Attendance and CEC Sheet, which will be used to record continuing education credits.
