OEM FOM Revised 6/2003

OBJECTIVES OF THIS MANUAL

1. Provide guidance to medical personnel on their role and responsibilities as providers of occupational health services.
2. Standardize procedures for medical surveillance and job certification of employees.
3. Provide guidance for occupational health providers on the management of occupational injuries and illnesses for military and civilian personnel.
4. Outline and clarify occupational medicine reporting and record keeping requirements.
5. Provide guidance on training and certification requirements for Navy occupational medicine staff.
6. List a concise bibliography of occupational health resources, references and directives.
